Learning disabilities constitute a diverse group of disorders in which children who generally possess at least average intelligence have problems processing information or generating output. Their etiologies are multifactorial and reflect genetic influences and dysfunction of brain systems. Reading disability, or dyslexia, is the most common learning disability. Latency – the sine qua non of AR and VR | Valve Clearly, something has to change in order for latency to get low enough for AR/VR to work well. On the tracking end, the obvious solution is use both optical tracking and an IMU, via sensor fusion. The IMU can be used to provide very low-latency state, and optical tracking can be used to correct the IMU's drift.
