PHP and MySQL provide a robust, easy-to-learn, open-source solution for creating superb e-commerce sites ... pycse - Python3 Computations in Science and Engineering 4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.
